IMPORTANT SAFETY INSTRUCTIONS

WARNING	To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:
<ul style="list-style-type: none">• Read all instructions before using the beverage cooler.• DANGER: Risk of child becoming trapped in new cellar, old beverage cooler/refrigeration unit, or large boxes. Junked or abandoned appliances, boxes and other containers are still dangerous, even if they will “just sit in the garage for a few days”.• Before you throw away your old beverage cooler or refrigeration unit: 1. Take off the door. 2. Leave the shelves in place so that children cannot climb inside.• Never allow children to operate, play with, or crawl inside the appliance.• Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.• Do not store in the vicinity of any other appliance. Do not store near gasoline or any other flammable vapors. The fumes can create a fire hazard or explosion. <p>-Save these instructions-</p>	

BEFORE USING YOUR beverage cooler

- Remove the exterior and interior packaging.
- Before connecting the beverage cooler to the power source, let it stand upright for approximately **2** hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- Clean the interior surface with lukewarm water using a soft cloth.

INSTALLATION INSTRUCTIONS

(a) General Installation Instructions

- This appliance is designed for free standing installation. Do not build-in or recess into closed cabinetry.
- Place your beverage cooler on a flat, solid floor that is strong enough to support it when it is fully loaded. To level your beverage cooler, adjust the front leveling leg at the bottom of the beverage cooler.
- When moving your beverage cooler, please do not incline it more than 45 degrees.
- Locate the beverage cooler away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the unit to perform improperly.
- Avoid locating the unit in damp areas.
- Plug the beverage cooler into a dedicated (for this appliance only), properly installed and grounded wall outlet. Do not under any circumstances cut or remove the third (grounding) prong from the power cord. Any questions concerning power and/or electrical grounding should be directed to a certified electrician or authorized product service center.

Operating Your Beverage Cooler

Setting the Temperature Control/Display panel

- 1) Light Control Button 2) Celsius / Fahrenheit Selector Button 3) LED Display
4) Temperature Increase Button 5) Temperature Decrease Button

- The wine cooler has an interior light. The light can be switched on and off by using the light control button **(1)**.
- The temperature display can be set to show either Celsius / Fahrenheit by pushing the selector button **(2)**.
- You can set the temperature as you desire by pushing the button  or  , **(4 & 5)**
- The temperature will increase 1°F if you push the  once, and the temperature will decrease 1°F if you push the  once.
- When the beverage cooler is plugged in for the first time, the LED display **(3)** will show the preset factory temperatures of 38°F.

LAYOUT AND STORAGE

Your cabinet was designed to store a maximum number of bottles securely. We recommend that you observe the tips below to optimize loading.

- Remove tape from shelves once unit is stable and ready for storage.
- Disperse the bottles evenly to avoid concentrating weight in one place. Bottles must not touch either the back of the cabinet or the step at the bottom.
- Make sure that the bottles are not all grouped together either at the top or bottom of the cabinet.
- Only pull out one shelf at a time. Never attempt to pull more than one.
- Maximum weight capacity per shelf is 55 lbs.

CARE AND MAINTENANCE

Cleaning Your beverage cooler.

- Turn off the power, unplug the appliance, and remove all items including all shelves.
- Wash the inside surfaces with a solution of warm water and baking soda (approximately 2 tablespoons of baking soda for each quart of water.)
- Wash the shelves with a mild detergent solution.
- Wring excess water out of the sponge or cloth when cleaning area of the controls, or any electrical parts.
- Wash the exterior with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.
- Vacuum the front grill and back of the unit twice yearly. Make sure the power is off before cleaning.
- It is recommended to clean the unit completely inside and out once a year to maximize the longevity of the beverage cooler.

Power Loss

- Power failures that are corrected within a few hours should not affect the temperature of your appliance if you minimize the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take other measures to protect your contents.
- If the unit is unplugged, loses power, or is turned off, you must **wait 3 to 5 minutes before restarting**. Attempting to restart the beverage cooler before this time has elapsed may prevent the beverage cooler from starting.

Absence/Vacation

- **Short vacations:** You may leave the beverage cooler powered on and unattended for absences of less than three (3) weeks.
- **Long vacations:** If the appliance will not be used for more than three weeks, remove all items and turn off the appliance. Clean and dry the interior thoroughly. To prevent mold growth, leave the door open slightly, blocking it open if necessary.

Moving Your beverage cooler

- Remove all items.
- Securely tape down all loose items (shelves) inside your appliance.
- Turn the adjustable leg up to the base to avoid damage.
- Tape the door shut.
- Be sure the appliance stays secure in the upright position during transportation. Also protect the outside of the appliance with a blanket or similar item.

Energy saving Tip

- The beverage cooler should be located in the coolest area of the room, away from heat producing appliances, and away from direct sunlight.

TROUBLESHOOTING GUIDE

Many common issues with your beverage cooler can be solved very easily. Try the troubleshooting tips below should you experience any problems.

PROBLEM	POSSIBLE CAUSE
Beverage cooler does not operate.	Not plugged in. The appliance is turned off. The circuit breaker tripped or a fuse has blown out.
Beverage cooler is not cold enough.	Check the temperature control setting. External environment may require a higher setting. (e.g. room needs to be air conditioned) The door is opened too often. The door is not closed completely. The door gasket is not sealing properly.
Beverage cooler is turning on and off frequently.	The room temperature is hotter than normal. The door is opened too often. The door is not closed completely. The temperature control is not set correctly. The door gasket does not seal properly.
The light does not work.	Not plugged in. The circuit breaker tripped or a fuse has blown. The light bulb has burned out. The light button is "OFF".
Vibrations.	Check to assure that the beverage cooler is on a level surface.
The cooler seems to make too much noise.	A faint humming noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerator in your beverage cooler. Contraction and expansion of the inside walls may cause popping and crackling noises. The beverage cooler is not on a level surface.
The door will not close properly.	The beverage cooler is not on a level surface. The door was reversed and not properly installed. The gasket is dirty. The shelves are out of position.
The area around the door, top, or side is hot.	Your beverage cooler comes with a heating element near the door that keeps frost and condensation off the glass and it's normal for this area to feel warm. It will not affect the temperature inside the beverage cooler.

TECHNICAL DATA

Model Number	269 01 40 01
Type of cooling	Compressor
Climate type	ST
Electricity protection grade	I
Nominal voltage/Frequency	115 Volts/60Hz
Ambient operating temperature	60-77 degrees Fahrenheit
Temperature Range	34-43 F
Range of inside cabinet humidity	60%RH
Item weight	45 lbs
Item dimension (W X D X H)	17" X 19" 32 ¾"

WARRANTY INFORMATION

LIMITED WARRANTY

Length of Warranty: This Limited Warranty lasts for one (1) year from date of receipt of purchase of the beverage cooler ("Limited Warranty Period"). Extended warranties may be available for an additional cost at the time of purchase or up to the seventh month from date of purchase. These extended warranties would extend this one (1) year limited warranty to two (2), three (3), or five (5) years. Details about our extended protection plans can be found @ wineenthusiast.com.

Who is Protected: This Limited Warranty protects the original purchaser during the Limited Warranty Period, provided that such purchaser can present appropriate proof of original purchase.

What is Covered: This Limited Warranty covers any defects in workmanship or materials in your new beverage cooler under normal use.

What is Not Covered: The following are not covered by this Limited Warranty damage due to such things as accident, misuse, abuse, mishandling, neglect, unauthorized repair, failure to properly maintain, acts of God or any other cause beyond the reasonable control of the Wine Enthusiast whether similar or dissimilar to the foregoing.

Purchaser understands and acknowledges that the beverage cooler is a wine refrigerator, which houses wine.

Purchaser assumes all the risk of using these units, including risk of spoilage, humidity variations, temperature variations, leaks, fires, water damage, mold, mildew, dryness and similar perils that may occur.

What We Will Do: During the Limited Warranty Period, Wine Enthusiast and/or the manufacturer will, at its sole discretion, repair or replace any beverage cooler not operating within the manufacturer's specifications. All costs for labor and materials thereto shall be covered during the Limited Warranty Period. If Wine Enthusiast deems the beverage cooler is not repairable, Wine Enthusiast will use the value of your original order toward a replacement; provided, however, that the purchaser will be responsible for all shipping and handling costs with respect to the replacement after the initial ninety (90) days after the date of receipt of original purchase. ***After the initial ninety (90) day period after the date of receipt of purchase, purchaser must pay any shipping and handling charges that are incurred in shipping or transporting the beverage cooler for service under this Limited Warranty.*** Wine Enthusiast reserves the right to substitute materials of substantially similar quality in the event that identical materials are not available at the time the Limited Warranty services are performed. Wine Enthusiast reserves the right to request that purchaser contact a local refrigeration company to service the beverage cooler.

How to get Warranty Service: In the event your beverage cooler is not operating within the manufacturer's specifications, during the Warranty Period, contact customer service by email at custserv@WineEnthusiast.net or by phone 800.648.6058.

Limitation of Implied Warranties: All implied warranties, including warranties of merchantability and fitness for a particular purpose, are limited in duration to the length of this Limited Warranty.

Exclusion of Certain Damages: Wine Enthusiast's liability is limited to replacement or repair of the defective beverage cooler. Wine Enthusiast shall not be liable for any damages, whether incidental, consequential or otherwise, because of any defective beverage cooler.

How State Law Applies: Some states do not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

The Limited Warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
